PROFESSIONAL SUMMARY

Third-year B.Tech Computer Science & Engineering student at Amity University Mumbai with hands-on software development experience from a remote Web Development Internship at SAM AI Technologies and four full-stack projects. Write clean, readable code using JavaScript, React.js, Node.js, Express.js, Python, and Flask, with working knowledge of REST APIs, MongoDB, MySQL, Git, and debugging. Strong problem-solver and quick learner, comfortable working remotely and communicating progress clearly. Seeking an SDE Internship to contribute to real product work and grow in professional software engineering practices.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Responsive Design
Backend: Node.js, Express.js, Flask, REST APIs, API Integration, User Authentication
Databases: MySQL, MongoDB
Programming Languages: JavaScript, Python, Java, C++, SQL
Core Concepts: Data Structures, Object-Oriented Programming, Debugging & Troubleshooting, REST API Design
Tools & Workflow: Git, GitHub (version control), VS Code, GitHub Pages deployment

INTERNSHIP EXPERIENCE

Web Development Intern – SAM AI Technologies (Remote) *10 June 2026 – 10 July 2026*

- Delivered three web projects on schedule in one month while working remotely (PawMart, TaskFlow, and a personal portfolio), spanning full-stack, frontend-only, and static-site development.
- Built PawMart, a full-stack e-commerce application, with a React.js frontend, Node.js and Express.js backend, and MongoDB database.
- Developed TaskFlow, a task manager in HTML, CSS, and JavaScript supporting task creation, editing, deletion, and status tracking.
- Deployed a responsive portfolio website on GitHub Pages, using Git and GitHub for version control and tracking changes.

PROJECTS

PawConnect – Pet Adoption & Rescue Portal – Python, Flask, MySQL, HTML, CSS, JavaScript

- Designed and implemented Flask REST APIs with MySQL integration to manage users, pet listings, and adoption and rescue requests across the portal.
- Developed a responsive interface for browsing pet listings, submitting adoption requests, and reporting animals needing rescue.

PawMart – Pet Supplies E-Commerce Platform – React.js, Node.js, Express.js, MongoDB

- Architected the full-stack e-commerce flow, using advanced problem-solving to resolve complex MongoDB connection challenges while implementing product search, filtering logic, and secure checkout processes.
- Investigated and debugged database connectivity issues to ensure stable, performant data retrieval.

KisanSetu – Smart Agriculture Platform – Python, Flask, MongoDB, HTML, CSS, JavaScript

- Developed a smart agriculture portal that lets farmers sell produce directly—adding products, placing and tracking orders—with an integrated AI feature comparing market rates across regions, built on a Flask backend, MongoDB data storage, and a responsive HTML, CSS, and JavaScript interface.

PERSONA – Team Hackathon Project

- Collaborated with a team to develop and present PERSONA at the Nirman Hackathon 2026 and National Level Project Competition, effectively communicating technical features to judges.
- Articulated project requirements and technical design decisions during team-led presentations and hackathon demonstrations.

Additional Projects: Weather App (real-time weather API integration); Dictionary App (meanings, phonetics, pronunciation, search).

EDUCATION

B.Tech, Computer Science & Engineering – Amity University Mumbai *2024 – 2028 | CGPA: 7.65/10*
Class XII – SS Junior College, Seawoods | **Class X** – St. Mary's Multipurpose High School, Vashi

COURSES, SIMULATIONS & ACHIEVEMENTS

- **Job Simulations (Forage):** Deloitte Technology (October 2026); Tata Group GenAI-Powered Data Analytics
- **Learning Courses (AWS Skill Builder):** Developer Associate (DVA-C02); Cloud Practitioner (CLF-C02)
- **Participation Certificates:** Nirman Hackathon 2026 and National Level Project Competition 2026 (PERSONA)

LANGUAGES

English, Hindi, Marathi
